INDUSTRY EXPERIENCE

PhD Software Engineer Intern

05/11/2025–07/31/2025

Google

- Implement first-party FreeBSD OS support for Google Cloud Platform.
- Lead intern team to AI2 Intern Hackathon 1st place with \$5500 prize.

Founding Engineer

07/25/2022–04/14/2023

Abbey Labs

- Bootstrap the infrastructure to host complex data ingestion and workflow workloads.
- Rapidly prototype software to find product market fit.

Software Engineer

10/12/2021–07/22/2022

Meta

- Implement Android camera hardware abstraction layer (HAL) for AR/VR products.
- Develop Linux/Android native system services in C++ to support AR/VR use cases.

Software Engineer

11/30/2020–09/20/2021

Amazon

- Implement and maintain a specialized workflow orchestration platform in Kotlin/Java to support Amazon Prime.

Software Engineer

03/18/2019–11/12/2020

Uber

- Migrate a Python backend service to a gRPC Go service resulting in 30x speedup.

EDUCATION

Ph.D., Computer Science

06/2028

University of Georgia

Advisor: Wenwen Wang

B.S., Electrical Engineering and Computer Engineering

06/2017

University of California, Davis
